

Mini Sock Piglet

©2009 Cutest Creations

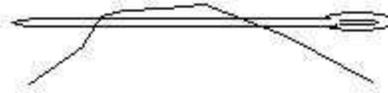

Materials needed:

- hand needle/thread
- 1/4" wide ribbon
- Invisible ink marker
- 1 pair of Pink newborn sized crew socks (not ankle or low cut, preferably flat knit)
- Dark pink embroidery thread
- Pink All-purpose thread
- White all-purpose thread
- scrap of white flannel fabric
- other flannel scraps
- scrap of satin-like fabric
- polyester fiberfill stuffing

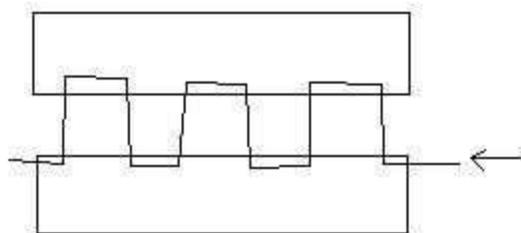

Basic Sock Toy making techniques: There's a few basic hand stitches and knots you should know when making sock toys, which if you're not aware of yet, you may want to practice before beginning. These are very simple once you get the hang of it.

Tying a quilting knot: Insert threaded needle into a small piece of the fabric, leaving the tip of the needle sticking out of the fabric, wrap thread around tip of needle 3 times and pull needle through, pulling knot tight, insert needle back into the toy at the knot to hide your knot, then cut thread off. See illustration:

With threaded needle, insert needle into fabric as shown below. With the needle tip sticking out of the fabric, you will wrap the thread around the tip 3 times, hold in place and pull needle through, pulling the knot tight, you can then go back in at the knot site, pulling your knot to the inside of your toy, pull needle out and cut string this makes your knots hidden and looks much nicer.

Using a blind stitch: A blind stitch attaches two pieces of fabric together without the threads being seen. You begin with your threaded needle, holding your two fabrics together or pinned together, insert needle in and then out of fabric piece #1, then directly in and back out of fabric piece #2, going along like this until connected. See illustration below.

Thread enters in and back out on side one, then over to side 2 in and back out.

Embroidery: If you have your embroidery floss handy, you'll notice that there's 6 individual strands wound into one. When I embroider, I like to use only two of the strands, just pulling out two of the strands. Especially on small toys, you don't want your eyes/mouth too thick. This embroidery stitch is great for embroidering a straight line.

Embroidery back-stitch diagram:

Embroidery Back Stitch

Enter needle into fabric at point 1 going over top of fabric into point 2, then under fabric into point 3, then over into point 4, continue in this way until your line is finished.

All seams are 1/4" unless otherwise stated. Begin and end all hand stitches with a quilters knot, begin and end all machine stitches with a back-stitch to secure. All parts are attached with a blind stitch.

Choosing Socks: You can make a nice toy from most socks, however, after trying several types, you will find a style that you prefer and that's easiest to work with. Some socks have a lot more stretch than others and may stretch beyond the size you'd hoped for after stuffing, no matter the original size of the sock. I usually don't like to get those, they are usually the type that are fussy on the inside. I prefer to work with flat knit socks, which are smooth and flat on the inside and outside of the sock. They're much easier to sew and don't stretch so far. If a newborn sized sock stretches beyond 5 1/2" long or wider than 2" after being stuffed, it may not fit some of the pattern pieces. If it happens that you've made a toy from a stretchy sock, you can still use the pattern pieces. Just re-size the pattern pieces by laying the pattern piece down on paper, then tracing the shape 1/4" larger than the original all the way around. (Or larger than 1/4" if needed, depending on how much your sock stretched after stuffing). Knowing this rule will also allow you to use the patterns with different sized socks.

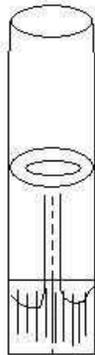

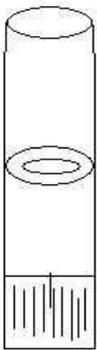

To make the mini pig: You will need both socks, one sock will become the head, body and legs of your toy. The other sock becomes the arms, nose/mouth, ears and tail of your pig.

-Turn your first sock inside out, Lay your sock flat with the heel of the sock facing you, draw a line down the middle of the sock starting about 1/2” from the heel, all the way to down to the opening of the sock, this will be your guide line when sewing the legs up. With your sewing machine or hand needle/thread using your line as a guide, not sewing on the line but 1/4” on each side of the line, you will sew two separate legs. *When sewing with machine, remember to always begin and end your stitch with a back-stitch to secure your stitches. You now have the body of the toy sewn. There is an opening between the legs in which you can now turn the sock right side out and stuff with fiberfill.

Illustration:

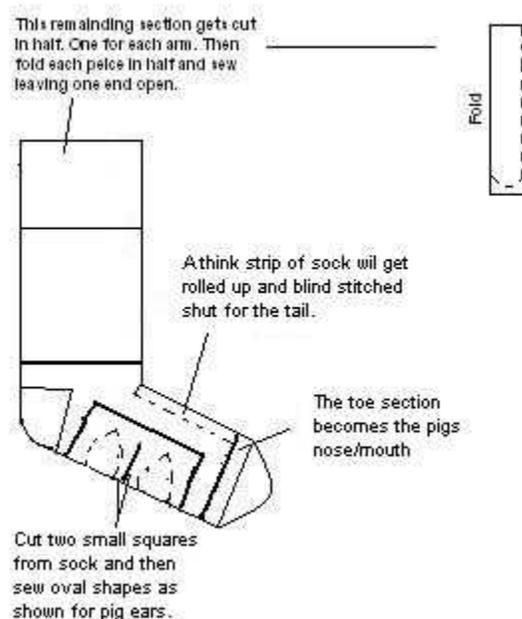

Lie Sock flat with heel of sock facing you

Draw a line down the middle and sew the legs on each side of line, leaving middle open for turning.

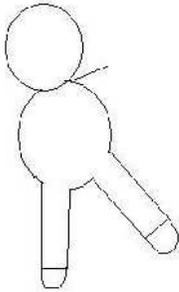

- Your other sock can be sewn/cut as shown in the illustration below. All cuts shown are going through both sides of the sock, so you're cutting the front and back at the same time. Cut out toe of sock leaving $\frac{1}{4}$ " all the way around to allow for the seam. This will become the pigs nose. Cut two squares from the foot end of the sock longer pointed ears onto the squares, then trim $\frac{1}{8}$ " around stitches. The ears and tail from a baby sock will need to be hand sewn, as they are too small for the machine. It may be possible to sew the arms with the machine, if you are accustom to sewing small knits, if not, you may find it easier to just hand sew these small pieces. Cut out the cuff section of the sock for the arms, cut in half, so that you have two separate pieces for the arms, fold each in half and sew into arms as shown in illustrations below. You can then stuff the arms. An un-sharpened pencil may help stuffing these small parts.

Illustration:

- Optional: The photo example shown did not have a neck, however if you prefer the look of a neck on your toys; using a piece of doubled up thread, tie around to form a neck around the top portion of the monkeys body. *If you wanted to hide the neck string, you could do a blind stitch all the way around the string.

Illustration:

- You are now ready to sew the body opening closed and attach the parts. Use a blind stitch to close up the body opening. You will use a blind stitch to attach all parts. Begin with the nose, centering it best you can. Shape the nose piece into a circular shape of a pigs nose, turning the edges in all the way around the shape of the nose, use a small amount of stuffing in the nose and pin to hold, then blind stitch in place. Attach the ears, making sure they are evenly spaced on each side of the head, bend the ears downward to give it the baby pig look, put a small stitch to hold them down. Then the arms; turn the open end in 1/4" and attach them just below the neck line, making sure they line up with the ears on each side. The tail should be rolled up long ways and blind stitched along to hold together. Insert needle on one end of tail making a knot on the end of the sock, then inserting into the tube of the tail and out the other end. Wrap the tail around a toothpick or thick needle, then pull the thread making it curl around the toothpick, put a knot on the tail to hold the curl. Attach the tail about an inch above the pigs bottom.

- Using pink embroidery thread, embroider pink sleeping eyes. Embroider two small pink circles on the pigs nose.

Cut a piece of ribbon and make a small bow to attach to the pigs head. Using pink threaded needle, knot the string onto the bow, then pull through pigs head, pulling the bow against the pig, weaving in and out of the bow and the pigs head, then knot to secure in place.

Making the Diaper: Using the White flannel fabric scrap, cut out the pattern piece. (There's 2 different sized diaper patterns depending on the size of your finished sock). Fold 1/4" hem all the way around the straight diaper edges, pinning to hold in place. I don't usually bother sewing a hem around the curved edges, since they will be tucked in around the toys legs anyway. You can machine or hand stitch folded hem leaving 1/8" seam. You can use very small pieces of Velcro on your diaper, if you want it to be removable or you can attach the diaper to the pig by putting it on and sewing the diaper fastened. Be sure to cut a small circular hole in the diaper for the pigs tail to fit through. Attach a bow to the front of the diaper.

If you are permitted by Cutest Creations to make and sell toys made from this pattern, you must include the following statement on any page, labeling or packaging for your toy.

*This toy is made from a pattern from Cutest Creations, the original designer. I have been given permission by Cutest Creations to sell toys made from the pattern.

All illegal sales of this toy will be removed from any online listings. Copyright infringement is taken seriously by Cutest Creations.

Mini Security Blanket: Optional: You can make a mini security blanket to go with the pig. It looks sweet to personalize the blanket with an embroidered name. Attach a bow above the name. Cut out the 4 felt squares, sew together in a quilting fashion; shown below. Then lay the finished square on top of a piece of satin fabric for the back of the blanket, cutting the satin 1/2" larger than the blanket top. With right-sides together, sew 1/4" around edges, leaving a small opening to turn right-side out. Turn and close opening with blind stitch. You can attach a small piece of Velcro to the hand of the pig and the edge of the blankie, so the pig can hold onto the blanket.

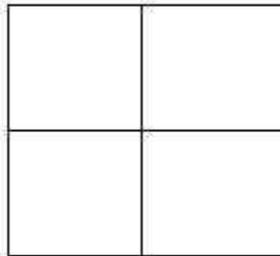

Attach first two squares

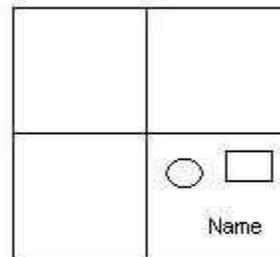

Then attach other two squares

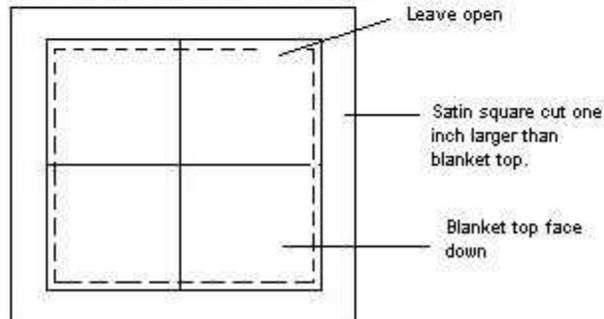

Then attach both sets together to make large square

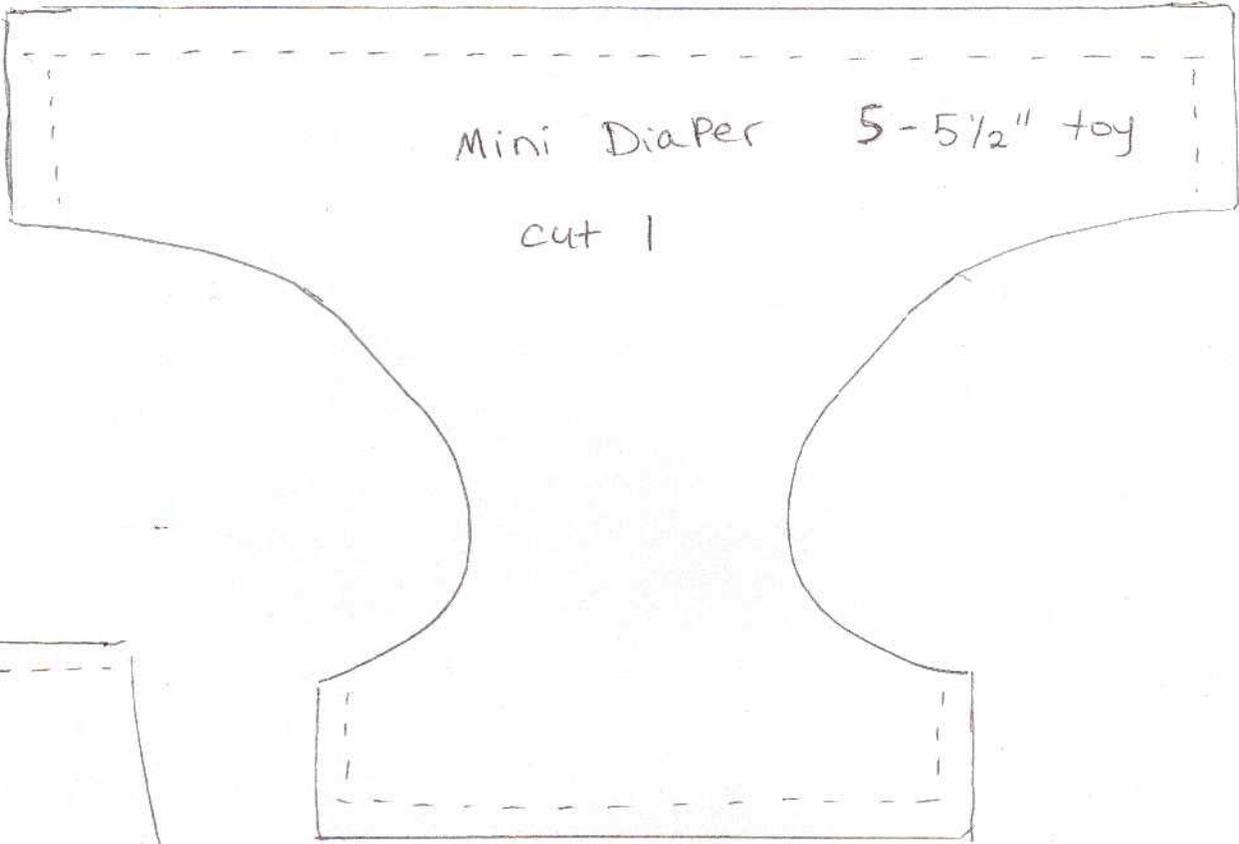

Next embroider name, add felt embellishments

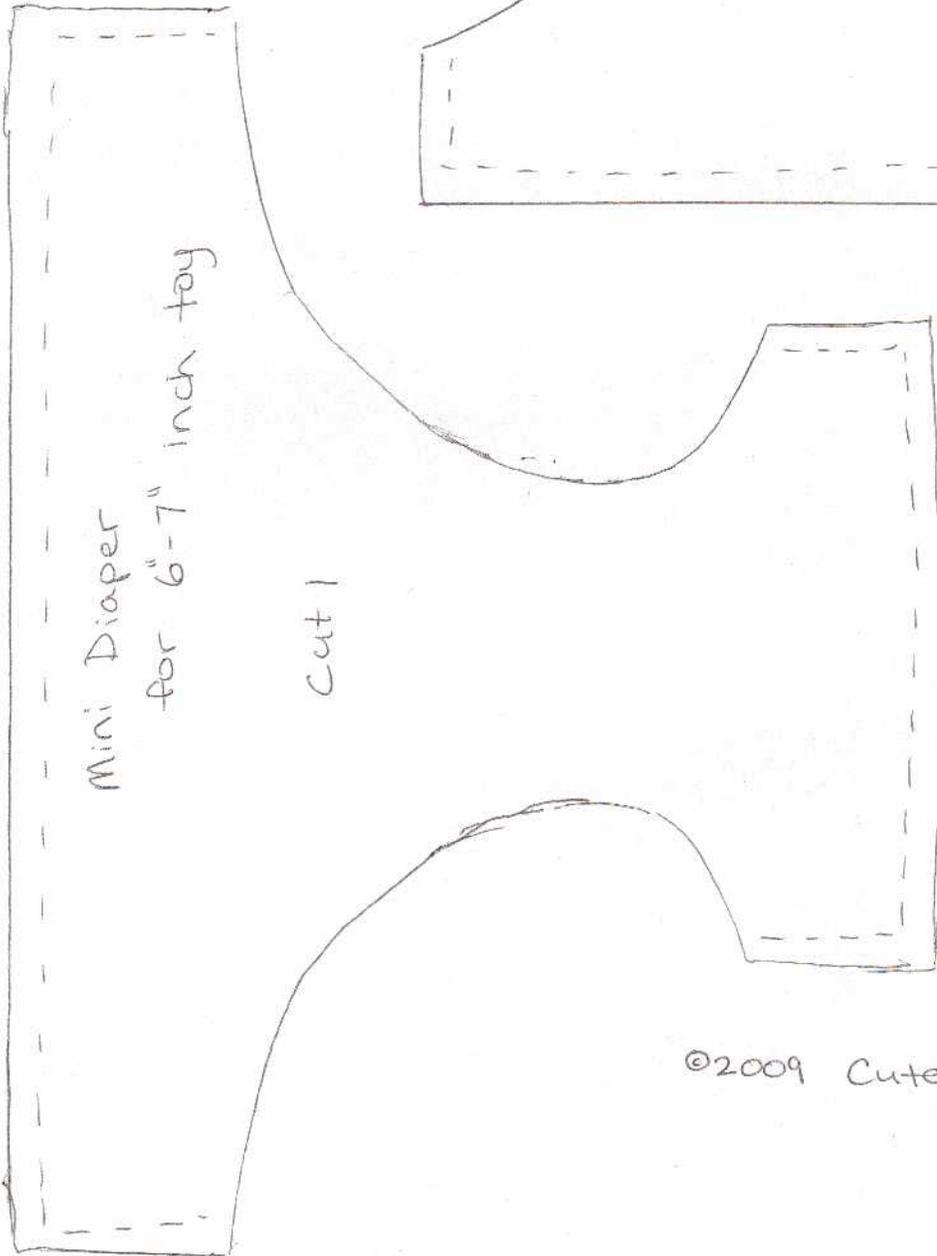

Attach satin to the back, right sides together, leaving small opening for turning
